

2021 Patient Feedback Survey for Revalidation (Anonymous)

Question: The doctor would appreciate any suggestions as to how he/she could improve:

"I have never met a doctor as competent, empathic and caring as Dr Tavakkoli. I just hope she will continue with her practice and I am happy that I have found her and I am one of the lucky patients that are treated by her."

"The consultation was in-depth, she had clearly prepared in advance to be up to date with my situation. She was respectful of my feelings and offered many options to allow me to feel like I had some control over my health, providing me with a way to work with the traditional medical methods. This is a rare and invaluable part of a journey of this nature and I am so very grateful to have found her and to have her involvement."

"I really can't say as it is early days for me with just an initial consultation and agreeance to start a treatment. However, she gave me something that up till now was absent. Hope! She gave me some hope."

"Overall I felt very comfortable and safe in Dr Aryan's care. I was advised and supported appropriately."

"I am not sure I can think of anything that she could improve."

"A very sincere person who really wants to help people suffering with cancer. She has a huge knowledge of integrative treatments."

"I hope that Dr Tavakkoli continues to work in exactly the same way as she does presently. In the spirit of constructive criticism I have given it thought, but failed to find anything to comment negatively upon."

"My doctor is knowledgeable enough to recommend dietary requirements without the need to consult with a nutritionist."

"Hard to say really early into our relationship. I just find her very knowledgeable about a tricky clinical area, very focused in consultations and very personable. I developed high trust levels very early on and these have not altered. Communication is very good, very personable. Referrals out to other organisations have been very valuable. I find the level of science behind her treatment thorough, valid and reliable and have found the research links very important. This has been significant in establishing trust. Annotated, explanatory PowerPoints that explain her work and therapies maybe on the website or available as a link, would add to patient understanding of what they are doing and why, the kind of thing that might underpin an explanatory presentation to colleagues. That is because this is a bit different to say the least and takes a while to get your head around! There may be more that I could add later on in my programme but that is the main thing for me. To understand, so the treatment makes sense (although the supporting info sent out is very clear as well). This is just coming at it from another angle."

“No improvements, I received a warm and very informative consultation and I feel able to go back to ask Dr Tavakkoli any further questions or advice if I needed to.”

“Excellent service, keep up the good work.”

2021 Colleague Feedback Survey for Revalidation (Anonymous)

Question: Other strengths of this doctor?

“All my interactions with Aryan in a professional capacity have been excellent. She has always responded to emails and requests efficiently and appropriately. Always been able to provide useful, evidence-based advice. She is up to date in her field of expertise. She has excellent communication skills and is able to provide effective education and training for both patients and healthcare professionals.”

“Compassionate and thoughtful, Dr Tavakkoli uses up to date evidence based medicine to provide a truly holistic experience for her patients. I trust her clinical judgement explicitly and value her professional opinion immensely. I would not hesitate to refer patients, friends or family members alike - knowing with certainty they would receive truly exceptional care.”

“Dr Tavakkoli is extremely knowledgeable and compassionate, and works hard to provide benefit for her patients.”

“Independent thinker. Very professional in approach. Patient safety is highest priority.”

“Dr Tavakkoli is always calm, collected and helpful. She assesses patients/situations holistically and works towards the safest outcome for all. It's a pleasure to work with her.”

“Very articulate as well as open minded and incessantly searching to expand and update her professional knowledge.”

“As a private health professional I have worked with several of Dr Tavakkoli's patients through her clinical referral over the past couple of years. All of the patients I have spoken with hold her in a high regard as a doctor and have expressed feeling properly assessed, listened to and being given good medical advice (and treatment/s) by her; which is backed up in my opinion by good clinical notes. I have always found her incredibly knowledgeable in her field, as well as in her overall medical knowledge, well mannered, well presented and punctual/organised.”

"I would put my health in the hands of Dr Tavakkoli without a second thought."

"Dr Tavakkoli is a highly patient-centred and motivated doctor and will go to great lengths to achieve the best results for her patients. She takes an active interest in developing science, again in the interests of improving care. She is an excellent role model and educator, freely sharing her clinical experience and insights. Any of the above questions that I have answered 'Unable to comment' to, I have no reason to suppose she is other than excellent. An exemplary doctor."

"I am impressed by her ability to think outside the usual medical paradigms and to embrace new technologies. Evidence of sincere compassion and empathy."

"Good in management, gifted speaker and presenter of complex medical subjects, pioneering ambitions."

Question: How could this doctor become more effective?

"By cloning herself so her knowledge could reach more people. Jokes aside, I can't think of any ways to suggest that she becomes more effective."

"No comments."

"I cannot think of any suggestions at this point."

"Not work so much."

"More emphasis on correspondence with colleagues."

"I have no advice."
